

Dynamic ip switching

Command:

- dial command: `ipclient appkey 1 change` (your own appkey is located in the upper right corner under the avatar--》 at the bottom of Account Profile)
e.g.: `ipclient a94d3ff9ca3044c8a8778ad7b84dec94 1 change`
- bind command: `ipclient appkey 1 bind`
e.g.: `ipclient a94d3ff9ca3044c8a8778ad7b84dec94 1 bind`

The demo uses lua language(Remove comments by yourself when using)

```
1 //Replace the appkey here with your own value
2 local APPKEY = "a94d3ff9ca3044c8a8778ad7b84dec94";
3
4 function switchIp(APPKEY)
5     //Prevent the phenomenon that there is no bind success
6     os.execute("ipclient "..APPKEY.." 1 bind");
7     os.execute("ipclient "..APPKEY.." 1 change");
8     os.execute("sleep 20");//It takes a while to dial
9     os.execute("ipclient "..APPKEY.." 1 bind");
10 end
11
12 switchIp(APPKEY)
```
